

CoagClinic™

# Get Connected!

ProTime® results are imported into the CoagClinic anticoagulation software through a simple cable connection.

Results are instantly displayed in CoagClinic from the ProTime with just one click!

The screenshot shows the CoagClinic web application interface. At the top, there is a navigation bar with links for Home, Clinic, Patient, Reports, Tools, Log Off, and Help. The patient's name, DeSouza, Martin, is displayed prominently. Below the name, there are two lines of diagnostic information: "P: Atrial Fibrillation / 427.31" and "S: Abnormal Coagulation Profile / 790.92". To the right, the INR Range is shown as "2 To 3.5". A secondary navigation bar includes tabs for Patient, Visits, Meds, Notes, PMH, PrevRX, Education, OtherLabData, and Print. Below this, there are radio buttons to select the clinic: CoagClinic (selected), CholesterolClinic, HemaClinic, DMClinic, and All Clinics. The main content area contains a form with fields for Patient Last Name (DeSouza), Patient First Name (Martin), Social Security # (234-55-6331), Medical Record # (123-44-7), Physician (James Mattson), Office (Surgery), Office Phone ((383) 838-3928), and Office Fax ((298) 347-2389). There are also checkboxes for "More Information" and "Priority Patient". Below the form, there is a section for diagnosis and treatment goals, including Primary Diagnosis (Atrial Fibrillation / 427.31), Secondary Diagnosis (Abnormal Coagulation Profile / 790.92), I.N.R. Goal (2.75), I.N.R. Range (2 to 3.5), Treatment Start Date (1/1/1999), and Treatment End Date. A comments field contains the text "fragile/talk only to the wife". A "Next Tab" button is located at the bottom right of the interface.

**ProTime**®  
Microcoagulation System

# CoagClinic, the leading provider of comprehensive anticoagulation software.

## Improved Practice Efficiency

- Eliminates multiple chart pulls
- Streamlines clinic workflow
- Data integration with EMR/LIS systems available
- Accurate capture of patient visit information

## Comprehensive Patient Outcome Tracking

- Extensive built-in reporting
- QA report shows time in range with graphs
- Patient-summary report charts patient progress
- Overdue mailing list provides ability to send out patient letters using Microsoft® standard tools
- PST results integrated with leading IDTFs
- Powerful ad hoc query tools allow users to access customized reports

## Secure Access to Patient Information

- Powerful Secure Sockets Layer (SSL) encryption insures confidentiality
- HIPAA compliant audit trails, tracking and password safeguards

## Streamlined Reimbursement Processing

- Allows for integrated capture of documentation to support reimbursement of patient visits
